QMASTOR's Horizon™ APS software selected by Global Resource company

February 18, 2009

The Directors of QMASTOR Limited (ASX:QML) are pleased to announce QMASTOR has secured a major contract with an Australian Iron Ore producer for the provision of Horizon™ Advanced Planning and Scheduling (APS) software. The contract covers software licensing and services with the majority of revenue expected to be received in the 08/09 financial year.

QMASTOR will supply the client with an optimised APS solution for their two iron ore export ports in Western Australia.

The Horizon application will provide a platform for optimised planning and execution of shipping logistics at the two ports. QMASTOR's solution will help the client to improve product throughput, minimise demurrage and optimise resource utilisation.

Managing Director Trent Bagnall said "Horizon™ APS is a recent addition to QMASTOR's product portfolio that has facilitated a number of new contract wins over the past 4 months.

We are delighted to be able to offer this solution to an existing client as part of their Marine and Port Management project.

This success in the Ports sector reaffirms QMASTOR's vision to be the leading supplier of software solutions across the entire mining supply chain."

About QMASTOR Limited

QMASTOR Limited (ASX: QML) is a market leader in the provision of specialist management information systems and services to the global mining, port, power generation and other bulk commodity industries. QMASTOR has pioneered innovative solutions to empower clients to improve their operations and maximise profit through the efficient use of resources across the supply chain.
