QMASTOR's Pit to Port and iFuse Selected for New Zealand Coal Chains

March 4, 2008

QMASTOR Limited (ASX: QML) announced today that it has secured a contract with Solid Energy New Zealand Limited for the provision of its Pit to Port.net and iFuse systems in a corporate wide agreement.

Solid Energy will use Pit to Port.net to manage the supply chains from their mines through to invoicing of vessels for the export market. The system will also be used from mines to steel and power generation plants and other domestic coal distribution management. The solution for Solid Energy includes integration with Maptek's Vulcan resource model, Lyttleton Port of Christchurch and several mine site data sources and instrumentation.

Steve Maxwell, General Manager of QMASTOR Limited stated "The selection of Pit to Port by Solid Energy, through a comprehensive, competitive tendering process again demonstrates that Pit to Port is the best of breed system and market leader for mining and bulk commodity supply chain management."

Trent Bagnall, Managing Director of QMASTOR Limited stated "We welcome Solid Energy as a QMASTOR client and look forward to their contributions and their ability to leverage value from our rapidly growing bulk commodity supply chain management community."

About Solid Energy New Zealand Limited

Solid Energy, a state owned enterprise, is a major New Zealand energy producer and a leading producer of high-quality coal for export and for New Zealand markets. From its seven mines, Solid Energy last year sold 4.8 million tonnes of coal. Solid Energy invests in research and commercialisation of new sustainable forms of energy that use coal, and in renewables such as biomass, biodiesel and solar that help New Zealand in its transition to clean, affordable and renewable energy forms.

About QMASTOR Limited

QMASTOR Limited (ASX: QML) is a market leader in the provision of specialist management information systems and services to the global mining, port, power generation and other bulk commodity industries. QMASTOR has pioneered innovative solutions to empower clients to improve their operations and maximise profit through the efficient use of resources across the supply chain.
