

QMastor wins contract for provision of pit-to-port system

QMastor Limited, a leading Australian supplier of bulk materials management information systems and services, has announced that it has secured a five-year contract with Queensland Bulk Handling (QBH) for the provision of the Pit to Port.Net management information system. QBH manages the coal export terminal at Fisherman Islands in Brisbane, Queensland, Australia.

The scope of the contract involves the use of the Pit to Port.Net system for the management of:

- ❖ rail receipts;
- ❖ port stockpiles;
- ❖ berth and vessel scheduling;
- ❖ ship loading and coal export tracking; and
- ❖ automated data entry to corporate accounting system.

Managing director of QMastor Limited, Trent Bagnall, said: "QMastor is thrilled to be able to partner with QBH to assist them in managing their coal export terminal operations. This installation represents QMastor's second port-based system installation in a segment of the bulk materials supply chain where QMastor adds significant value."

ABOUT QUEENSLAND BULK HANDLING PTY LTD (QBH):

Queensland Bulk Handling Pty Ltd (QBH) operates the 8mt/annum-capacity export coal loading facility at the Port of Brisbane in South-east Queensland.

This terminal has serviced mines from the West Moreton and Darling Downs coalfields as a common-user facility since 1983. QBH has an admirable record as a despatch port and is capable of loading small cape size vessels. QBH is a joint venture between New Hope Coal Australia and Patrick Corporation Limited.

ABOUT QMASTOR LTD:

QMastor Limited provides a suite of bulk material management systems that allows mining, port, power generation and agricultural companies to maximize their profitability through the efficient use of their resources. QMastor's systems are integrated into the day-to-day running of bulk material businesses, managing over 100mt/annum of bulk material movements through the operations, logistics, marketing and commercial functions.
