

# The I.T. Solution Award

Sponsored by: **Lloyd's List DCN**  
Daily Commercial News

**T**he I.T. Solution Award is for a system, software or information technology with specific application to bulk handling, bulk material scheduling or the supply chain.

The award was won by QMASTOR Limited, which supplies a range of software solutions, including Pit to Port.net, that enable integrated supply chain management for miners and bulk commodity producers.

QMASTOR's solutions allow: bulk material tracking, mine logistics management, mine planning and scheduling, stockpile management, stockpile modelling, grade control, blend management, mine reconciliation, process plant management, commodity marketing, contract management, systems integration, mine consulting, mine surveying and 3D laser scanning.

The company's long standing partnership with Microsoft enables incorporation of the latest .net technology platform.

QMASTOR systems currently manage over 270 million tonnes of bulk commodity movements per annum in coal, iron ore, nickel and bauxite for clients including BHP Billiton, Rio Tinto, Anglo American, Xstrata, Peabody Energy, OneSteel, PT Adaro and others.

Pit to Port.net is a management information system for companies operating export and/or domestic bulk materials supply chains. The system enables management to plan, record, track, optimise, account, reconcile and report

## Winner... QMASTOR
